GELINAS AND FORD DIRECTED TO ATTEND.

Were Not Present Friday Night at Meeting of Board of Aldermen.

Since neither Superintendent of Streets A. L. Gelinas nor Assistant Superintendent Irving M. Ford were present at the special meeting of the board of aldermen Friday evening, called to settle the dispute between them, the meeting adjourned until Tuesday evening, when both will be requested to attend. Charles De Villiers, who was elected chairman of the 3rd ward to succeed the late John L. Leonard, was present. There were about fifteen present in the spectators' gallery.

Many people who were against the appointment of Mr. Ford as assistant superintendent of streets are not in favor of Superintendent Gelinas succeeding him before he had a chance to prove his worth.

The meeting was opened at 8.05 by the reading of the notice of adjournment by City Clerk A. C. Scribner. Mr. Ford's letter of protest to the board of aldermen was read. The communication was accepted and placed on the agenda. Alderman Webster made a motion that the common council adjourn until next Tuesday evening at 8 o'clock and that Superintendent of Streets Gelinas and Mr. Ford be notified to be present. The meeting recessed while Corporation Counsel William A. King prepared a resolution to that effect. The resolution was unanimously adopted.

On account of the death of Alderman Leonard the following committee was named: Streets, Aldermen Bowen, Larabee, Jacobs, Light, Aldermen Jacobs, Flynn and De Villiers; department, Aldermen Webster, Flynn and Bowen; water department, Aldermen De Villiers, Flynn and Webster; library, Aldermen De Villiers and Webster; Claire Morrison Case, May Avery Gates, May Senior Lovett and A. Newton Vaughn; highway commission, Aldermen Jacobs, Larabee and Bowen; sanitary, Aldermen Carlson, Larabee and De Villiers.

The meeting was adjourned at 8.15 on Alderman Flynn's motion.

To Place New Fire Plug.

The city water on Jackson street, between Main and Valley streets, will be shut off Friday while the city is placing a new fire plug at the corner of Jackson and Valley streets. A break in the pipe leading from the water main to the hydrant last winter nearly caused a water famine in this city. The hydrant will be placed on the southwest corner of the intersection of the two streets, near the fire alarm box, instead of on the northwest corner, where it was originally.

Autotrucks From Akron.

Two large automobile trucks from Akron, Ohio, en route for Boston passed through this city Friday noon. There were two men in each car and they said that there were fifteen other trucks in the fleet, now somewhere in the United States; they did not know whether they were ahead of or behind the other trucks. One of the trucks carried the frame, body and engine of a truck, assembled, while the other carried the wheels, enabling two men to transport three cars.

The rear of the cars were covered with mud, but the men said that the worst roads were in Ohio and that they said that they were within 85 miles of their goal, after traveling over 900 miles.

Never Put a Croupy Child to Bed Without Giving a Dose of Foley's Honey and Tar Mothers know it stops croup because it cuts the thick clogging mucus, clears the throat of phlegm, stops the hoarse metallic cough, eases the difficult breathing, then quiet sleep. Mrs. T. Neureur, Eau Claire, Wis., writes: "Foley's Honey and Tar completely cured my boy of a very severe attack of croup. We know from experience that this is a wonderful remedy for coughs, colds, croup, whooping cough."

One of the men was far from well on their journey without eating dinner, but his comrade persuaded him to eat. The cars were probably for the government and were labeled Ohio In Transit 229.

The women's committee report good progress. One member sold \$3,700 worth of the bonds. One of the women workers had an unusual experience when she saved a diamond ring, telling him to have the value of the ring determined and she would invest the result of the sale in Liberty bonds.

U. S. DEPT. OF AGRICULTURE HOW TO GROW Snap Beans

Bush and pole beans are among the most valuable and dependable crops of the garden. "When in doubt wait to plant—plant beans." Beans thrive best in a rather warm sandy loam, but may be grown on almost any kind of soil. For the best results the soil should not be too rich in nitrogenous matter, or the plants will run to foliage and stems at the expense of the pods. Beans will not withstand frost and the first plantings in the spring should not be made until about two weeks after the average date of the last killing frost. The soil should be in good condition and the rows should be laid out perfectly straight so as to make cultivation easy. One pint of the seed of most varieties of snap beans is sufficient for a 100-foot row. When the cultivation is to be done by horse, the rows should be from 30 to 36 inches apart. It requires from 40 to 60 days for snap beans to be ready for use if the weather conditions are favorable.

Successful plantings of string beans should be made at intervals of 10 days or two weeks throughout the growing season. By following this scheme a constant supply of tender beans will be assured.—U. S. Department of Agriculture.
